Suggested assignment of the Xondilios papyri.

In making this assignment regard has been had not only to quantity of pieces but also to their quality and not only to their appearance but to the character of their contents. It is hoped that each contributor has received good value and that a fair division has been made. The papyri were taken in sets according to the following arrangement:-

- A. Zeno papyri. 1. Apollonius letters; 2. "Complete" (i.e. complete or approximately so) papyri; 3. Incomplete papyri; 4. Smaller fragments.
  - B. Later papyri. 1. Miscellaneous; 2. "Complete" Roman or early Byzantine papyri; 3. Incomplete Roman papyri, including small fragments and scraps.
- The division works out as follows:-

B. H. A. Apollonius 1; "Complete" 14; Incomplete 20; Smaller fragments 5. B. "Complete" 8; Incomplete 16. Total 64.

Michigan. A. Apollonius 2; "Complete" 17; Incomplete 20; Smaller fragments 5. B. Miscellaneous 4; "Complete" 7; Incomplete 13. Total 68.

Columbia. A. Apollonius 2; "Complete" 15; Incomplete 22; Smaller fragments 5. B. "Complete" 16; Incomplete 9. Total 69.

The British Museum thus receives fewer papyri than the other contributors and its quota includes rather fewer pieces in really fine preservation, but the special interest of two or three of the papyri assigned to it (e.g. 1,70, 179) and the length of 132 suggested, in compensation, a rather larger assignment to the others, whose quotas however include several very notable papyri. The proposed distribution (which is approved by Mr. Gilson, after inspection of the whole collection) is sent to the other contributors in order that they may have an opportunity of raising any objections which occur to them.
